

Janus de Vries
Papendrecht, Netherlands

Professional Summary

Analytical Full-Stack Developer with a strong foundation in Ruby on Rails, React, and Python. Combines a Master's degree in Philosophy (focused on logic and complex problem-solving) with years of experience in data-driven retail trading and automation. Proven ability to build, deploy, and maintain robust web applications independently through rigorous self-directed training.

Education & Training

Full-Stack Ruby on Rails | The Odin Project (Sept 2025 – June 2026)

- An intensive, project-based curriculum covering computer science fundamentals, Git workflows, test-driven development (TDD), and deploying production-ready applications using Ruby on Rails and React.

M.A. Philosophy of Contemporary Challenges | Tilburg University (2020 – 2021)

- Focused on advanced logic, critical thinking, and ethics. Completed 30 extra credits mainly from business ethics.
- Thesis: "The Populist Prince" (Analysis of modern populism through Machiavelli).

B.A. Liberal Arts and Sciences (Humanities Major) | Tilburg University (2015 – 2018)

- Multidisciplinary program emphasizing research methodologies, structured argumentation, and system analysis.

Experience

Retail Trader & Automation Developer | Self-Employed (2018 – Present)

- Analyzed market data and executed financial strategies, transitioning from short-term trading to long-term investing.
- Developed automated custom technical indicators and algorithmic trading scripts using Python and Pine Script to optimize data analysis.
